COMMISSIONING IN THE PHILIPPINES

Paul recently visited the Philippines to commission an 8 way 10 inch radial for chromite duty. The first day on site was spent giving a presentation and training on our hydrocyclones, to the operations staff, so that they were

fully prepared before test work began.

The commissioning was extremely successful with variations to the feed being tested and analysed. Each time the hydrocyclones performed exactly as required. The return journey, however, was every traveller's nightmare. Tropical Storm Trami hit Manila just before Paul

landed and the domestic flight from the site was so turbulent

that some of the passengers were offering up prayers. Flooding prevented him transferring to the international airport and as many flights had been cancelled he was stranded but thanks to fantastic local support by the client he was able to move to a hotel and

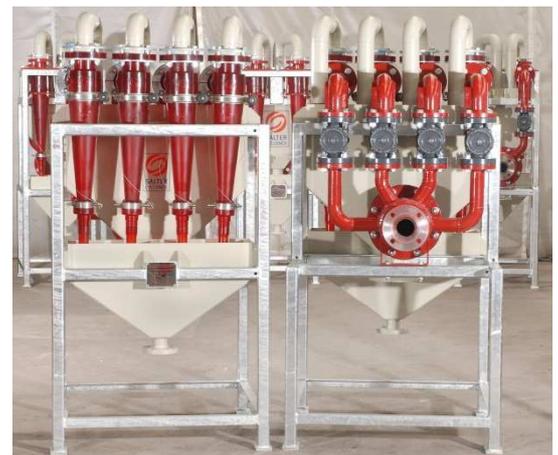

eventually travel back to the UK 4 days later.

A REPEAT ORDER FROM SOUTH AMERICA

This 4 way 4 inch desliming package is to enhance a multi-stage process treating tantalum.

The client already has Salter Cyclones, 5inch, 4 inch, 3 inch and 2 inch hydrocyclones installed on-site.

TUNNELLING for BAKU METRO

A large quantity of 5 inch hydrocyclones were incorporated into a separation plant, forming part of the Baku Metro tunnelling operation.

The performance and wear life of hydrocyclones is critical in this situation and ours have been proven time and again on many of these tunnelling projects.

WATER REUSE

A long term client has been upgrading facilities recently and purchased a SC2018 fitted with 16, 2 inch hydrocyclones with ceramic bodies and spigots. This will remove grit from the water, used to clean fleeces, so that it can be reused again in the process system saving disposal and source water costs.

NEW PERSONNEL

We are very pleased to welcome the following personnel who joined us in May and September respectively.

David Hinder is a **Design Engineer** and is working with Neil Farnfield our Senior Design Engineer

David Blake is an **Applications Engineer** and is working with Geoff Childs our Technical Director

SPARES

Don't forget we can offer a full range of spares for hydrocyclones, Test Rigs, Multi-Gravity Separator and Laboratory Mineral Separators.

Please contact our Spares Manager, Lyndon Collier for prices and lead times lyndon.collier@saltercyclones.com.

PLEASE DO NOT HESITATE TO CONTACT US FOR FURTHER INFORMATION ON ANY OF OUR PRODUCTS OR SERVICES

Salter Cyclones Ltd is committed to doing business ethically and has a Business Conduct policy in accordance with the UK Bribery Act 2011.
