- CLASSIFICATION
- DESANDING
- DEGRITTING
- DESLIMING
- THICKENING/DEWATERING
- SOLIDS REMOVAL

- HYDROCYCLONES
- TEST RIGS
- LAB MINERAL SEPARATORS
- MULTI-GRAVITY SEPARATORS
- SPARES & SERVICE
- TEST WORK

### PILOTING AHEAD

An 8 way 10 inch Hydrocyclone radial and an 18 way 2 inch Hydrocyclone assembly have been despatched for desliming and upgrading duties in a pilot plant. The minerals involved include chromite, hematite and gypsum. These units are specifically designed for quick and easy installation – simply connect to

pipework and the units are ready for operation.

### PACIFIC COAST TO COAST

A Laboratory Mineral Separator (SCLMS) was bought by a Public Research Centre in one of Canada's provinces. The centre supports the province's minerals and plastics sectors and the equipment is to be used for educational purposes during a 3 year mining course.

In a Research Laboratory in Japan the SCLMS will test industrial, bulk and fine chemicals, which form catalysts, in display materials and high performance additives.

Two Laboratory Size Multi-Gravity Separators (SCMG1) have also been sold to the Far East. One will separate coal as part of investigations for a mine damage reclamation project, the other is in a University Minerals faculty.

## ALL THAT GLITTERS....

SCTR1 Test Rig

An SCMG1 has been bought with an SCTR1 Test Rig and a 9 way 2 inch assembly (SC2009), for gold production in Armenia. The SCMG1 will upgrade gold whilst the hydrocyclones are to be used for a desliming application.

In another gold industry application 35 way 2 inch Hydrocyclone assemblies

form part of a two stage process to remove organic carbon from gold concentrate. These will treat approximately 2.5 t/hr solids

SC2009

## TESTING IN AUSTRALIA

An SCTR2 Test Rig supplied with 5inch, 4 inch, 3 inch, 2 inch and 1 inch Hydrocyclones has been delivered to a testing laboratory in Australia which is part of Bureau Veritas. The photo shows the test rig fitted with the 5 inch and 2 inch Hydrocyclones.

SCTR2 Test Rig

## SPARES

Don't forget we can offer a full range of spares for hydrocyclones, Test Rigs, Multi-Gravity Separator and Laboratory Mineral Separators.

Please contact our Spares Manager, Lyndon Collier for prices and lead times [lyndon.collier@saltercyclones.com](mailto:lyndon.collier@saltercyclones.com).
